## 14" TIMBERWOLF FORESTRY TREE SHEARS FOR SKID STEER LOADERS

### OVERVIEW

Available in grapple and bunching models, the Dymax 14" Forestry Timberwolf Tree Shears for skid steers are the best choice for forest harvesting shears.

Sharp, 3/4" AR400 milled knife edges cut through trees with ease. Blade adjustment and replacement is simple and easy.

The Dymax Timberwolf hydraulic system features larger lines, reduced pressure loss and a larger rod diameter in the shear cylinder. Hoses are routed internally and are protected from the abusive elements inherent in tree shearing operations. These integrated elements of the hydraulic system yield a 33% increase in shear speed, making the Timberwolf the fastest shear available today.

### FEATURES AND SPECIFICATIONS

- Each model features dual grapple arms that secure the tree prior to cutting.
- Heavy duty cylinders provide superior life and feature guarded hardline for added protection.
- Shear blade is comprised of 0.75" AR400 high tensile steel, and can achieve up to 2,500 hours of use if maintained properly.

	Grapple Tree Shear	Bunching Tree Shear
<b>Model No.</b>	DX-TS-FG-14in-SS-USS	DX-TS-FB-14in-SS-USS
<b>Weight (lbs.)</b>	2,150	2,250
<b>Height (in.)</b>	58"	66"
<b>Width at shear arms (in.)</b>	72"	72"
<b>Overall depth (in.)</b>	64"	64"
<b>Shear blade material</b>	3/4" AR400 - bolt on replaceable milled knife	
<b>Tower Material</b>	A-572	
<b>Hydraulics</b>	Max Pressure 3,000 psi. Flow Rates (min-max) - 15-30 gpm.	
<b>Connections</b>	Includes hoses to machine lines with standard flow, quick disconnects (flat face couplings).	Provided w/ electro-hydraulic diverter valve kit. Includes hoses to machine lines with standard flow, quick disconnects (flat face couplings).
