

# DYMAX WORK TOOLS

## SKELETON ROCK BUCKETS FOR WHEEL LOADERS, TRACK LOADERS AND TOOLCARRIERS

### OVERVIEW

Dymax Skeleton Rock Buckets feature spacing between steel ribs that allow the bucket to retain larger-sized rocks, while sifting fine material. Ideal applications include heavy-duty rock handling in quarries, dam sites or in stockpile applications.

Available in a variety of capacities, these skeleton rock buckets feature high strength, abrasion-resistant steel construction resists impact and abrasion from demanding job sites.

### FEATURES AND SPECIFICATIONS

- For wheel loaders, track loaders and toolcarriers.
- High strength T-1 steel (100,000 lb. yield) construction.
- Feature replaceable tips, or can be setup to accept OEM bolt on cutting edges.
- Dymax engineers can design customized buckets featuring wider or narrower spaces between the ribs as required.
- Spaces between ribs and holes in side plates allow loader operator to sift out fines before material is fed to crushing equipment.
- Available in sizes from 0.90cyd to 7.50cyd. Full list available online.
