

DYMAX WORK TOOLS

MULTIPURPOSE BUCKETS FOR WHEEL LOADERS, TOOLCARRIERS AND TELEHANDLERS

OVERVIEW

Dymax Multipurpose 4-in-1 Buckets for Wheel Loaders, Toolcarriers and Track Loaders are fabricated from high-strength alloy steel and designed for thousands of hours of profitable production.

These multi-purpose buckets are versatile tools, whether working as general purpose buckets, or operating in clamshell, back dragging, back filling and land clearing applications.

FEATURES AND SPECIFICATIONS

- Drilled to accept OEM bolt on cutting edges or teeth installed on the leading clamshell edge. Optional bolt-on edges are available for the backside of the clamshell if specified. All buckets feature clam positioning guides.
- A Dymax heat-treated bolt-on reversible cutting edge is installed on the dozer section.
- Large, high-quality cylinders operate the clamp portion of the bucket and the design provides for protection of those cylinders and fittings.
- Cutting side bar is beveled for increased penetration of material.
- Bucket floor design incorporates extra wear plates for back dragging and clamping applications.
- The spill plate features gussets for added strength in tough applications.
- Clam opens a generous 85-90 degrees, providing full access to the dozer portion of the bucket and allowing the bucket to be used in applications that require grabbing or clamping materials for hauling or moving.
- Available in a direct pin-on style or equipped with coupler hooks to fit the Dymax coupler system or other models.

Dymax opening indicator allows operators to know general clam positioning.
