

DYMAX WORK TOOLS

PUSH-OUT BUCKETS

OVERVIEW

Dymax Pushout Buckets for Wheel Loaders and Toolcarriers are the new way to handle light materials that require high dump heights.

Push out style buckets feature a hydraulically-driven ram that ejects the material from the bucket, avoiding the dump cycle of standard buckets and the hard-to-control rollout cycle of rollout buckets. They reduce loader lift arm fatigue and eliminate bucket fatigue associated with rollout buckets.

The highly controllable pushout bucket ram enables operators to meter material, thereby eliminating waste and spillage that occurs with rollout buckets. In certain applications, 5-6% reduction on overages is common.

FEATURES

- Two heavy duty cylinder rams.
- Available in coupler and pin-on models.
- Replaceable heat treated bottom wear shoes.
- Bolt-on replaceable interior bucket wipers seal bucket interior.
- Countersunk base edge with nylon plugs and replaceable bolt-on cutting edge.
- Available in 3-12cyd capacities.
