

Sand and Gravel Buckets

for Wheel Loaders and Track Loaders

DYMAX

SAND AND GRAVEL BUCKETS:
EXPERIENCE
IN ACTION

- **Dymax Sand and Gravel Buckets** for Wheel Loaders and Track Loaders are ruggedly built for years of productive use.
- **Sand and Gravel Buckets** are designed for use in abrasive materials or extreme wear applications, such as loading sand and gravel or charging asphalt plants.
- Buckets incorporate proven design criteria which yield superior loading characteristics over many general purpose buckets.
- **Dymax Sand and Gravel Buckets** are optimally designed to match individual loader operating standards, typically yielding additional capacity and production over standard buckets from other manufacturers.
- Buckets are available in direct pin-on models or with hooks installed to work with the **Dymax** coupler system or other popular couplers.
- **Dymax Sand and Gravel Buckets** are available for a wide range of machine sizes and in a variety of sizes and widths.

Sand and Gravel Buckets

- **Dymax Sand and Gravel Buckets** feature wear plates on the sides and bottom of the bucket.
- High strength T-1 steel is used throughout for greater durability and abrasion resistance.
- Cutting edges on **Dymax Sand and Gravel Buckets** are drilled to accept O.E.M bolt on edges, or can be ordered with specified edges installed.
- While **Dymax** recommends certain design parameters tailored to specific brands of wheel loaders, **Dymax** engineers will gladly work with dealers to custom design **Sand and Gravel Buckets** to unique customer job situations.
- **Dymax** specializes in designing and manufacturing attachments for specific applications. Contact **Dymax** Sales with your application and let **Dymax** solve your requirements.
