

DYMAX GRIZZLY

Dymax Grizzly Grapple Rakes for skid steer and multi-terrain loaders are built to withstand tough applications and abuse. Dymax Grizzly Grapple Rakes can be found in many different applications. Ideal for loading and piling brush, logs, rocks and light demolition debris, these versatile tools are also good for separating and sorting materials.

The Dymax Grizzly Grapple Rakes are employed in storm cleanup operations where they function to quickly load trucks with fallen limbs, brush and logs. Agri-businesses use them in pasture cleanup, right along with a Dymax Ranch Axe Tree Shear, Qwiksaw tree saws, and Vortex Brushcutters. Foresters use them in removal of downed timber while contractors find them perfect for cleaning up job sites and light demolition. Horticulturalists and nurseries put the Grizzly to work in cleanup as well as loading and carrying hay for seeding operations.

Dymax Grizzly Grapple Rakes are available in standard 72" or 84" models.

Dymax Grizzly Grapple Rakes

- Heavy duty tine structure
- 3/4" Thick Outside Tines
- 1/2" Thick Center Tines
- Cylinders are pinned with standard clevis pins
- 8.5" tine spacing standard

Call and ask a Dymax sales representative which model will work best for your application.

WARRANTY

The Grizzly is backed by a 2 year, 1000hr structural warranty. Contact Dymax for more information.
