

DYMAX WORK TOOLS

RECLAMATION DOZER BLADE

OVERVIEW

Dymax Reclamation Dozer Blades feature large wings and deliver maximum performance for dozing overburden and slot dozing. These blades increase dozing capacity by 40% over traditional stock model dozer blades.

Dymax reclamation blades feature large U-shaped wings with a proven moldboard radius, delivering quick loading performance and filling the blade to capacity for the push. Many mines prefer this style of blade over that of a traditional carry dozer, as it delivers more material per pass and provides better fuel burn.

Blades can be equipped with a variety of specialty liner systems such as the Dymax RokGaard Carbide Wear Package, which provides the highest strength and best wear resistance in the industry. With the RokGaard package, you get the best wear protection in the industry, resulting in reduced maintenance costs during the blade life. Dymax RokGaard products have achieved 35,000 hours on the original wear package!

FEATURES AND SPECIFICATIONS

- 2 year warranty - 5,000 hour warranty.
- 28° wing angle
- Includes replaceable OEM brand cutting edges and other specialty edges available upon request.
- Fits factory outside mount push arms or can be paired with a set of Dymax push arms on some machine brands.
- Available with RokGaard Wear Package for severe abrasion resistance and moderate to high impact environments.
- Available with Hardox 400 and Hardox 500 Wear Package for high impact, abrasive applications.
- Available with white iron wear blocks, side replacement shrouds and other types of wear protection.

Model #	Description	Weight lb	Weight kg
