360° LOGGING GRAPPLES FOR EXCAVATOR

OVERVIEW

Dymax 360° Log Grapples for Hydraulic Excavators are ideal for a variety of forestry operations, including landclearing.

These log grapples resist side-to-side deflection and provide long lasting performance in demanding environments. The guarding package protects the cylinder and motor drive systems from abusive elements and foreign debris. Easy to remove for servicing.

The Dymax 360° Log Grapple features a lock valve that provides positive load holding. Once pressurized, the load is secure and won't let go if the excavator loses pressure.

Clevis mount fits direct to stick linkage allowing customers to easily adapt to existing or new excavators. Available with optional hydraulic kit.

FEATURES AND SPECIFICATIONS

- High tensile strength, side reinforced grapple tines.
- Bolt-on cylinder ram guarding.
- Bolt-on rotator drive guarding.
- Heavy duty cylinder with built-in lock valve for positive load holding.
- Provided with standard clevis mount with hardened pin assembly.
- Available with optional hydraulic kit.

Model #	Description	Weight lb	Weight kg
DX-GL-LG-5inx62in-HX-11T	360° Logging Grapple - Hydraulic Excavator - 11 Ton	1,450	657
DX-GL-LG-5inx62in-HX-12T	360° Logging Grapple - Hydraulic Excavator - 12 Ton	1,450	657
DX-GL-LG-5inx62in-HX-13T	360° Logging Grapple - Hydraulic Excavator - 13 Ton	1,450	657
DX-GL-LG-7inx74in-HX-20T	360° Logging Grapple - Hydraulic Excavator - 20 Ton	2,250	1,020
