HEAVY DUTY GENERAL PURPOSE BUCKETS FOR HYDRAULIC EXCAVATORS

OVERVIEW

Dymax Heavy Duty General Purpose Buckets for Hydraulic Excavators are built to last by experienced welders in northeast Kansas. Backed by the best service in the industry, they are tough, durable, and will provide years of service.

These GP buckets are available with tapered or straight side plate designs. Tapered sides help prevent excessive wear on the side plates and prevent lodging the bucket in the trench. Buckets are equipped with horizontal bottom wear plating comprised of high tensile abrasion resistant steel, as well as exterior side wear plating and heavy duty weld-on teeth.

Designed around each machine, the Dymax Heavy Duty General Purpose Bucket for hydraulic excavators has superb loading characteristics, cleaning and heel clearance when curling the bucket.
