

Dymax Scrap Handling Grapple Buckets

Front Loader Backhoes

Dymax Scrap Handling Grapple Buckets for front loader backhoes can be found working in a variety of applications from landfills to storm cleanup and demolition environments.

Dymax Scrap Handling Grapple Buckets feature dual independent acting top clamps which operate through a single hydraulic source on the machine. Grapples work in path of least resistance and handle uneven sized loads helping prolong cylinder life.

Available as direct mount pin on or with coupler hooks to work with the **Dymax coupler system** or other popular coupler models.

Units are available with replacement tine tips, bolt on removeable side plates, open side plate or closed side plate designs. Units can be setup with replacement bolt on cutting edge or teeth depending on the application.

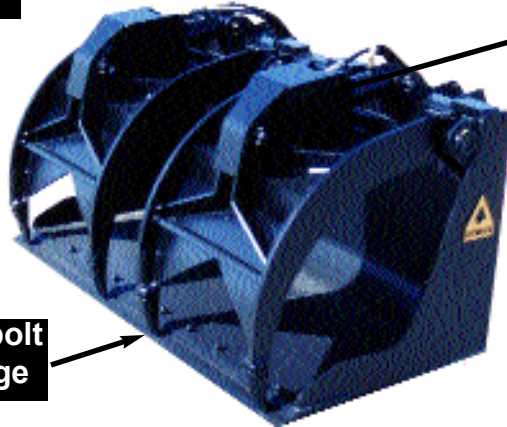

Hose routing and cylinders are well protected. Optional hose and cylinder guard packages are also available.

General capacities range from 1.00 cubic yard to 2.50 cubic yard capacity.

If you have a specific application and must meet application requirements contact **Dymax sales 1-800-530-5407 for more information or your local equipment dealer.**
