

DYMAX WORK TOOLS

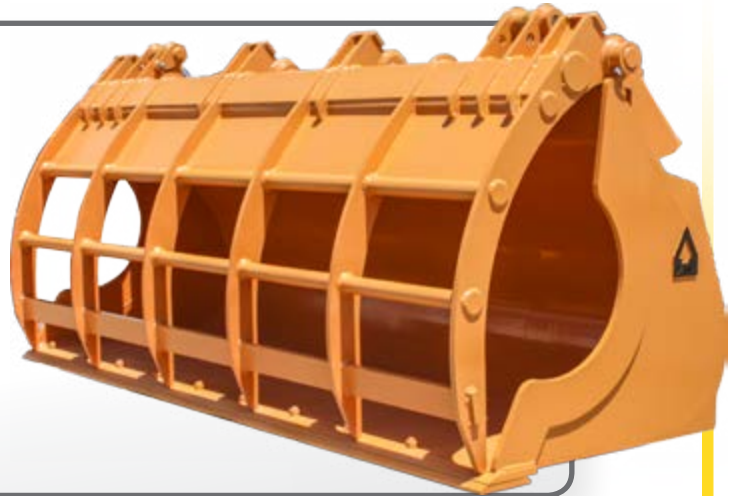

SCRAP HANDLING GRAPPLE BUCKETS FOR BACKHOE LOADERS

OVERVIEW

Dymax Scrap Handling Grapple Buckets for front loader backhoes can be found working in a variety of applications, from landfills to storm cleanup and demolition environments.

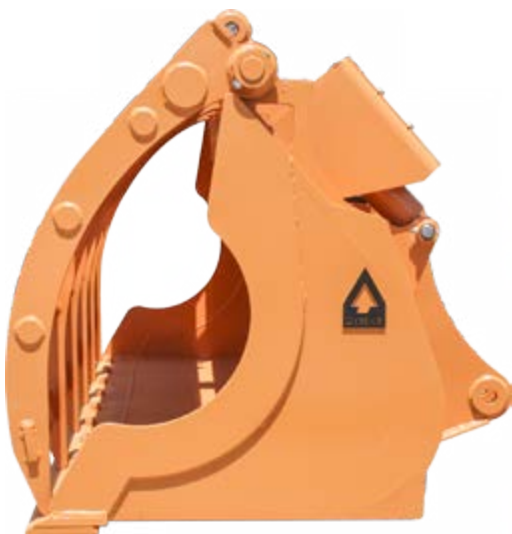

These grapple buckets feature dual independent-acting top clamps, which operate through a single hydraulic source on the machine. Grapples work in path of least resistance and handle uneven sized loads, helping prolong cylinder life.

Available as direct mount pin on or with coupler hooks, to work with the Dymax coupler system or other popular coupler models.

FEATURES AND SPECIFICATIONS

- **Top clamps operate independently through a single hydraulic source.**
- **Available as direct mount pin on or with coupler hooks.**
- **Available with replacement tine tips, bolt on removeable side plates, open side plate or closed side plate designs.**
