

Transfer Station and Refuse Buckets

For Wheel Loaders, Toolcarriers and Track Loaders

Dymax Transfer Station and Refuse Buckets enable wheel loaders to handle larger loads than with standard buckets.

Dymax Transfer Station and Refuse Buckets are designed around each application to maximize efficiency when working in refuse.

Dymax Transfer Station and Refuse Buckets feature a longer flat floor design for loading into trucks below the transfer station floor. The longer floor aids the operators in compacting trash more efficiently while in the truck. Heavy duty side cutters and integral floor supports are commonly found on larger sized **Dymax Transfer Station Buckets**.

Dymax Transfer Station and Refuse Buckets feature OEM bolt-on cutting edges or can be setup with teeth. Optional top clamp grapple assemblies are available if specified

Dymax Transfer Station and Refuse Buckets are available in an unlimited capacity range and style depending on the materials and given machine parameters.

Don't Forget - Like all **Dymax** products - **Dymax Transfer Station and Refuse Buckets** are backed by the best service in the industry. Contact **Dymax Sales 1-800-530-5407** for more information or your local equipment dealer.
