**DYMAX T-Railer 100K and 120K
Hauls Excavators, Cranes, Dump
trucks, Concrete Trucks and all your
standard heavy equipment on rail.
CALL TODAY!**

"ALL ABOARD"

The Dymax T-Railer 100K and 120K models offer customers more hauling capacity and superb power. Dymax T-Railer 100K and 120K models are the only hi-rail self propelled work platform where you can get on track at single road crossings. This is made possible by the unique turntable design which allows us to get you on track in remote locations.

With the ability to carry up to 120,000lbs the Dymax T-Railer 100K and 120K models are the economical, efficient way to move equipment and materials to work sites. On site, you can pour cement, spread ballast, perform general right of way maintenance tasks such as tamping, undercutting, tie exchanging, brushcutting, tree shearing or operate equipment directly from this mobile work platform.

Dymax has a long history of customizing equipment specifically to your requirements. So if you have a special job and need a special feature on your T-Railer, let us know. We can custom build units and also make them work with 3rd rail systems.

So whether you're a Class I or Class II railroad, a regional, a short line, a mass transit/light rail or a right of way maintenance contractor or drilling company, T-Railer 100K and 120K saves you time and money. You can set it on the tracks or put it back on the highway in minutes. Use the Dymax T-Railer and you can use all of your standard machines without converting them to high cost high rail system undercarriages.

T-Railer 100K & 120K - Platform

Heavy duty hydraulic ramps

Ballast Hopper
Spread ballast quickly

Main Platform
Available in 100,000lb or 120,000lb hauling capacity

Outriggers

Multi-axis oscillating rear tandem axle group
negotiates uneven track and tight radius curves with ease

Drive System
Hydraulic 2 speed tandem axle pivoting drive group cruises up to 15mph

Platform Width with swing outs (in.)	126.00
Platform Width (in.)	102.00
Platform height off rails (in.)	32.00
Total Weight (lbs)	38,000
Load Capacity 100K	100,000lbs
Load Capacity 120K	120,000lbs

T-Railer 100K & 120K - Power and Comfort

Engine	Deutz series 2012 L06 180HP (NET) 6 cylinder diesel Tier2/3 compliant
Drive System	Two-speed hydraulic with dual directional hydrostatic pump
Speed (m.p.h.)	15 mph (max) Speed will vary subject to actual grades & loads

Operator Chair
Comfortable chair with ability to rotate in different positions for visibility down the track, in both directions

Multi-Function Control Valve Stack
Hydraulic controls are in front of the operator. Additional open spools available for operating separate hydraulic attachments such as hand tampers, crane arms, hydraulic winches.

T-Railer 100K & 120K - Options

LCD Camera System
3 and 4 camera systems available

Enclosed cab
Heat & Sliding Window
AC optional

Ballast Spreading Hopper
Spread ballast and level quickly with spreader bar

Lights
Work lights, safety light installation
